PROBLEM

PHONETIC AWARENESS

Learners may not be fully aware of the nuances of phonetics in a new language

STRESS AND INTONATION

Effective communication involves not only accurate pronunciation of individual sounds but also correct stress and intonation patterns.

SPEECH CLARITY

Some learners may struggle with articulation and speech clarity.

SOLUTION

- This project would involve leveraging AI technologies, including speech recognition and natural language processing, to evaluate and provide feedback on a person's pronunciation. Distributed systems can be employed to handle the scalability and performance requirements of processing large volumes of audio data.
- Setting up a distributed system to handle the processing of a large number of audio recordings concurrently. This may involve using cloud-based services, containerization

Syllable Level Assessment

More Accurate Results

User Analytics

KEY WINNING FEATURES

TARGET MARKET

- Both individuals and organizations are a significant target market for pronunciation assessment tools. These tools enhance language learners' abilities by offering feedback on their pronunciation, aiding in skill improvement.

VALUE PROPOSITIONS

- Improves communication skills making life easier.
- Encourages learning new languages.
- Makes assessing easier for educational institutions.
- Telecommunication companies use speech assessment tools to improve voice recognition and customer service interactions through automated phone systems.

JUSTIFICATION

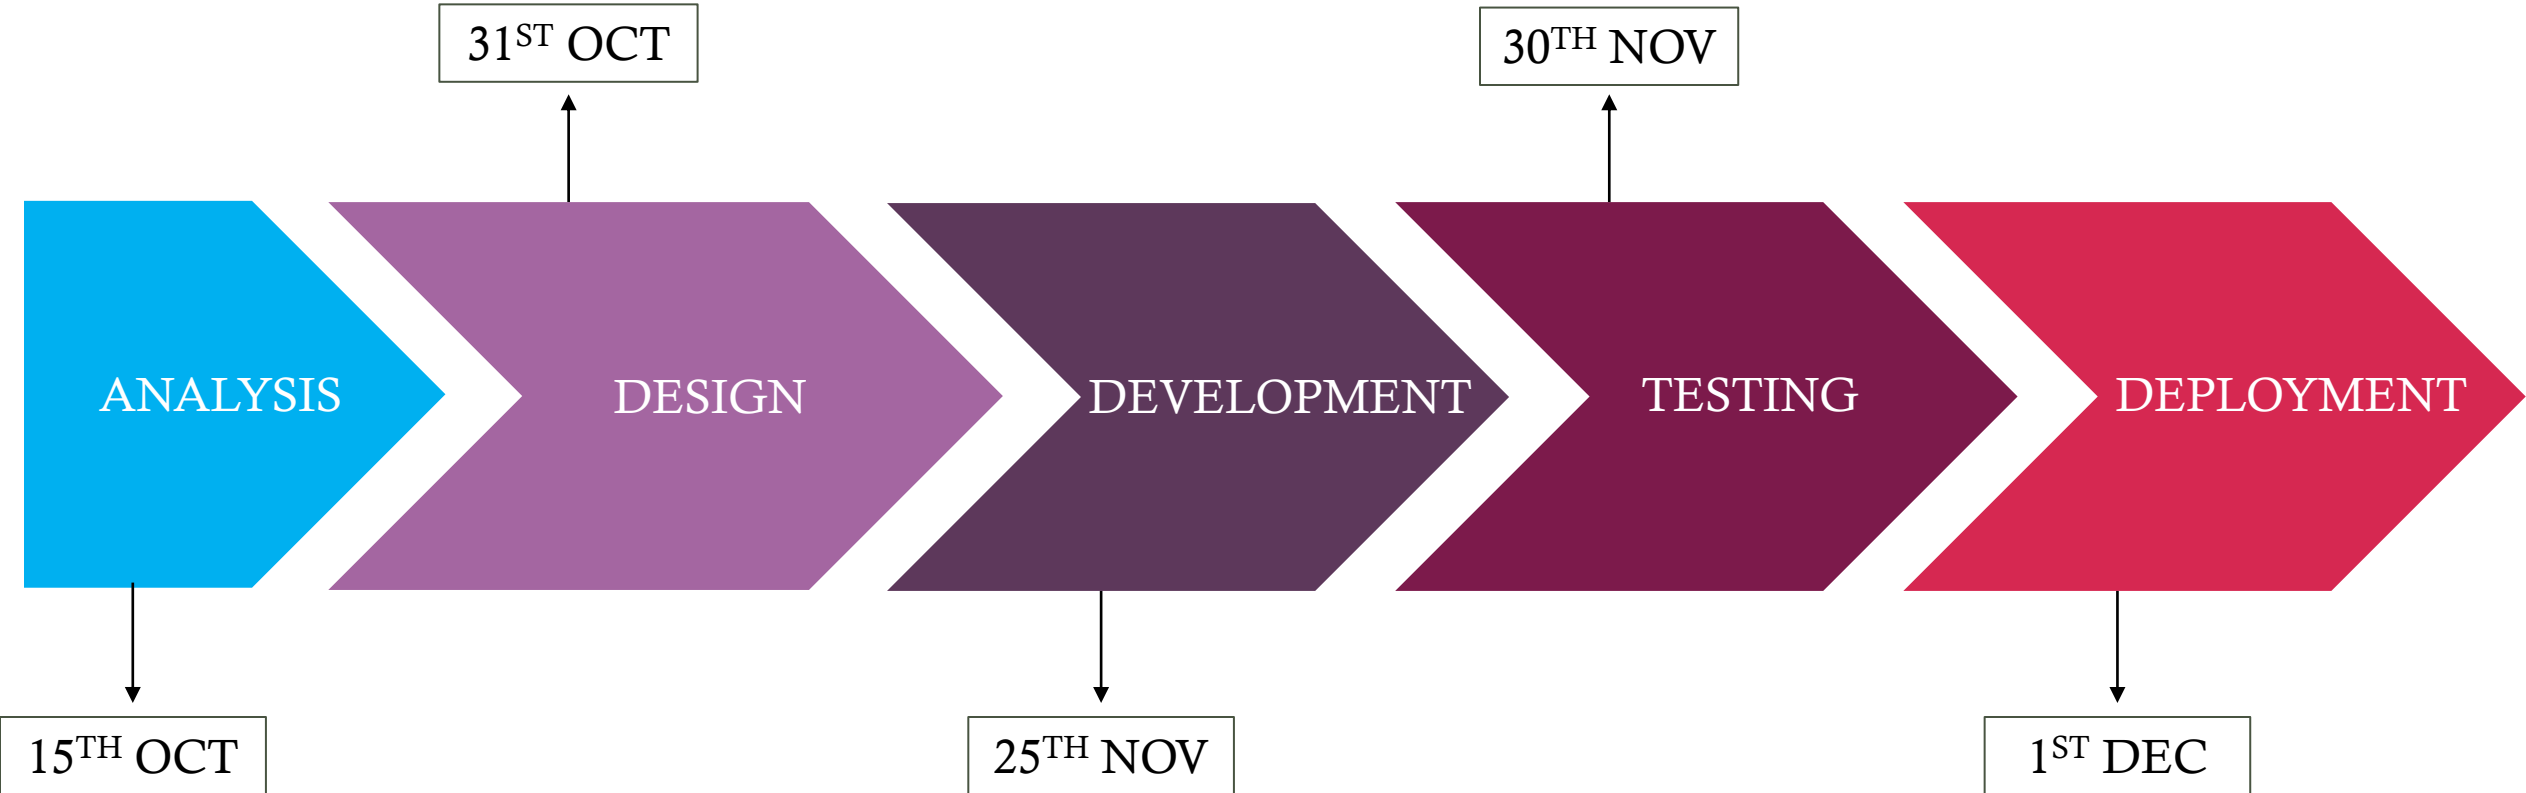

- Pronounce Pal will be a great tool for Educational Institutions and other organizations which includes Language Learning. It comes very handy for Individuals who are eager to improve there language fluency and also communication skills.
- It is very useful for telecommunications industry and also in Medical industry for diagnosing speech disorders.

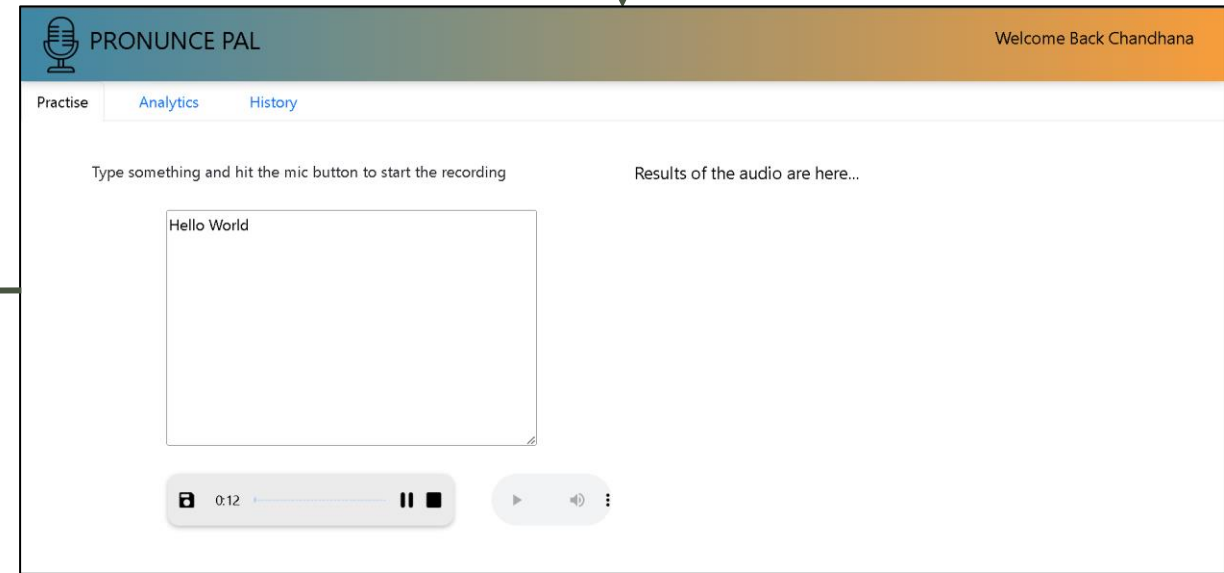

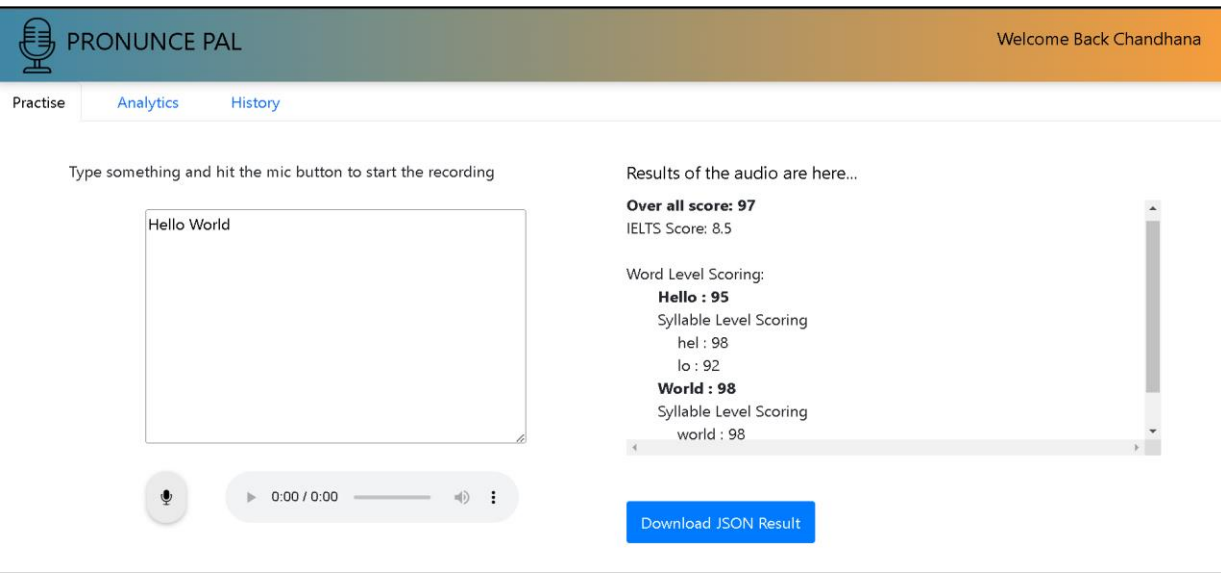

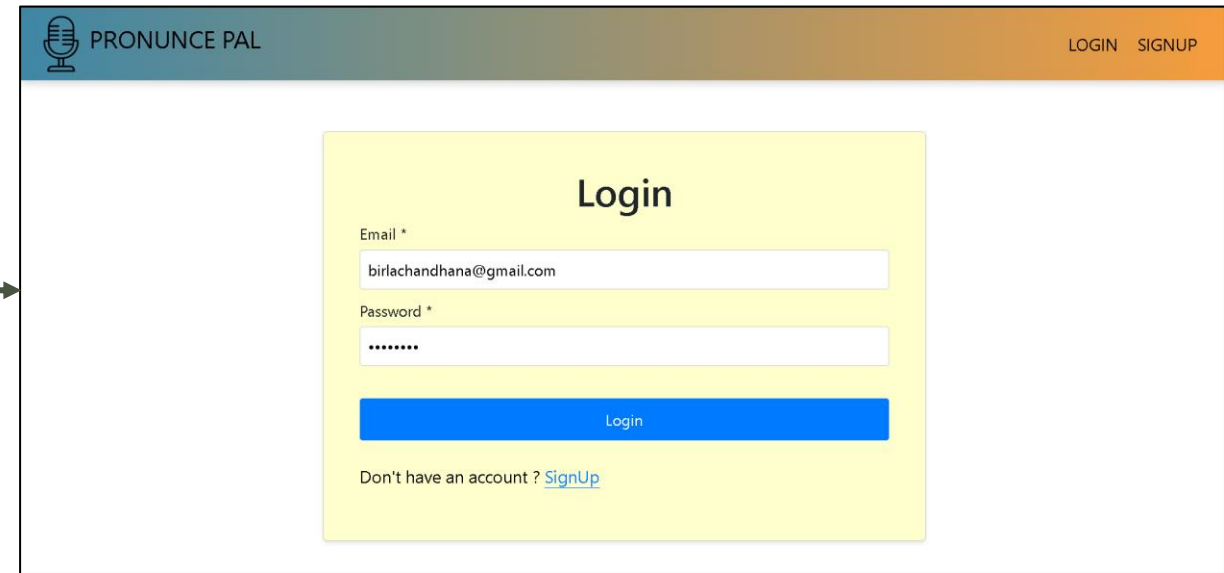

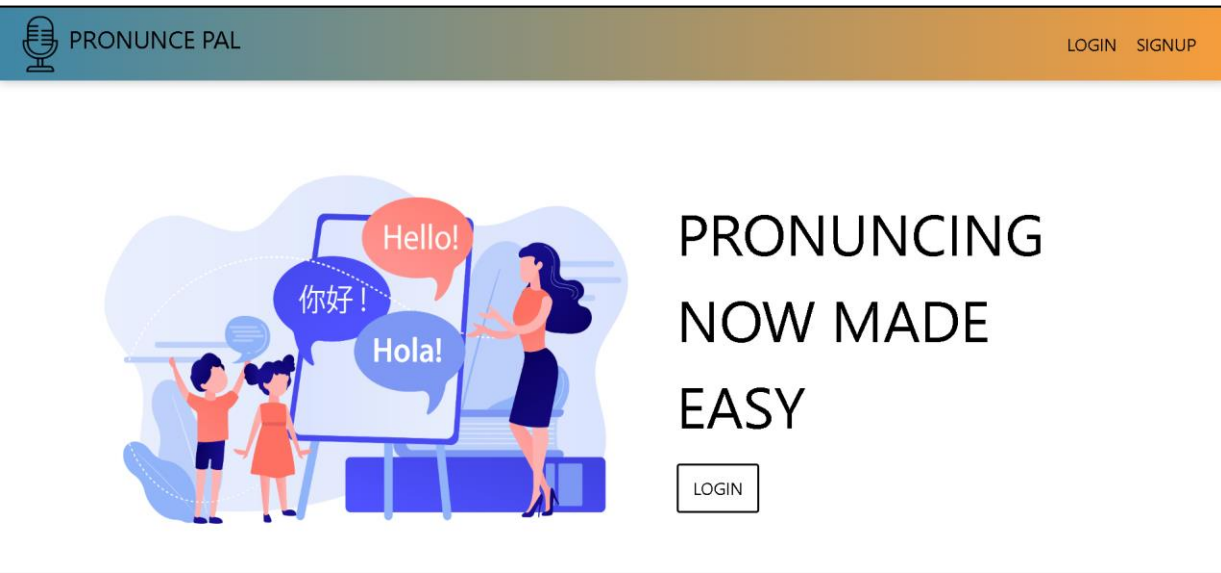

SIMILARITIES

- Pronounce Pal is similar to few other tools like Speech Super, Speech Ace.
- Providing Multi Lingual support and Synonym level Score is common in Pronounce Pal and Other tools.
- User Analytics is being added as an Extra Feature in Pronounce Pal
